Fund Manager Commentary

UK equities (as measured by the FTSE All-Share, on a total return basis) declined by 3.8% in December, significantly outperforming global equities but underperforming the domestic fixed interest market over the month. Global equity markets fell over the month as disappointing economic data from Japan, China and Europe sparked global growth slowdown fears, and concerns around trade frictions and European politics added to the macro uncertainty. Britain's Prime Minister Theresa May won a leadership challenge within the UK's Conservative party, ensuring she will not face a similar no-confidence vote for another twelve months. Yet Prime Minister May then failed to win concessions from the European Union that could have made the UK Parliament more likely to pass her Brexit withdrawal-agreement proposal. Consequently, the British pound was volatile. Within this context, the fund outperformed the benchmark over the month, buoyed by an overweight allocation to those areas of the market that are perceived as defensive in nature (Consumer Staples, Utilities and Communication Services) and an underweight allocation to the Materials sector. Investment activity during the month included the augmenting of existing positions in the permanent interest bearing shares (PIBS) of both Coventry and Skipton Building Societies.
