#### Fund Manager Commentary

UK equities (FTSE All-Share, on a total return basis) declined by 2.8% in August, underperforming both the domestic fixed interest market and global equities over the month. The domestic equity market fell against a backdrop of increased risk aversion as trade relations between the US and China deteriorated, while concerns rose over the stability of emerging economies such as Turkey, South Africa and Argentina following further strength in the US dollar. Within this context, the Higher Income Fund concluded the month in negative territory but outperformed the benchmark, positively impacted by its allocations away from the UK equity market (fixed interest and overseas equity). Most notably, the fund benefitted from the strong performance of its holdings in the US (Cisco Systems, Pfizer and HCP Inc) and Asia Pacific (China Mobile and Luk Fook Holdings) following a better than anticipated results season. The fund also benefitted from its underweight position to the weakest performing areas of the UK equity market, the tobacco and mining sector, with the latter negatively impacted by disappointing Chinese macroeconomic data.
